

## R'n'D Manager (Battery development)

*The main goal is to lead a research team in conducting lithium-ion battery development, improving existing designs and functioning as a guide for young padawans*

### Obstacles

- You will basically run day-to-day research activities, suggest who will be assigned to which project and see who has some unassigned time
- Working multi-functionally to develop prototype cell design and electrode formulations (basically the whole battery) for high-volume pilot production
- Plan and organize experiments, lab work and analyze electrochemical test results for cell chemistry and validation process
- Being the one who takes effective responsibility for identifying root causes, action plans development, estimate material needs and manage resources
- Providing supervisory function, but also work on motivation, safety (discipline) and performance with each team member

### You will also get

- A reasonable level of independence and influence
- A seat alongside founders in one of the fastest-growing and most promising companies on the market
- Asked about your training, development and career advancement
- Opportunity to learn from the amazing management team and work with the most modern technologies
- Fair compensation and benefits increases
- Sense of pride for working in the only high-tech lithium-ion battery production company in the region

### Your little helpers in company

- A very professional and motivated team, eager to change the industry
- International management team, experienced in production, battery industry, business development and amateur tennis

### Profile

State of mind: Research lab - My happy place

Preferable experience: Being a part of team that has created product that has undergone the serial production

Organizational skills: Able to organize safe trip to Marrakesh and back in 60 minutes, without using a mobile phone

Research experience: Been there – seen that – led that

People skills: Able to listen to other people, talk to them and motivate them

The best possible skill to have: Ice-cold breath for quickly extinguishing any fire

Send us your LinkedIn profile or CV and motivation letter (we actually read those)
